

# Site reliability engineer - Internship

## ABOUT

CTD is Silicon Valley VC-backed start-up company created in February 2019 with the mission of revolutionizing the way professional relationships are managed.

Distributed “remote-first” company currently with offices in Belgrade and San Francisco. We are focused on product-market fit with fast development cycles and constant user feedback.

We are looking for master students, recent graduates or students in their final year of bachelor study to work and gain practical knowledge during internship. This internship will be paid and candidates are expected to work full working hours. Candidates will get an opportunity for a full-time employment (based on their completion of studies and internship performance).

## REQUIREMENTS

- Master students or bachelor study at MATF, ETF, FON, RAF.
- Analytical and problem-solving skills.
- Experience in using Git.
- JavaScript with ES6 and/or TypeScript technical skills.

## WHAT WE OFFER

- Ability to grow and develop further as an engineer
- New offices with a pool and leisure area
- Work hard, play hard environment
- Super competitive salaries
- Generous equity plans
- Work environment that will help you grow and learn
- Fast-paced San Francisco startup experience
- Features designed, developed and deployed in days, not months
- Extremely hard technical problems that were not previously solved ( 100% guarantee not boring )
- Latest and greatest hardware and software tools
- Flexible working hours
- Remote-first culture
- Unlimited days of vacation
- Fun and inclusive atmosphere with high-performing colleagues
